TECHNICAL SPECIFICATIONS (Baseline Configuration)

Dimensions	Length	7.6m
	Width	2.3m
	Height	2.4m
Performance	Maximum Speed	60km/h*
	Gradeability	45°
	Side Slope	35°
	Vertical Obstacle	0.6m
	Trench	2m
	Engine Power	200hp
	Transmission	Auto 8 Forward 1 Reverse
	Steering	Hydraulic Articulated
	Turning Radius	7m
	Ground Pressure	17KPa
	Operating Temperature	-30°C to 49°C
	Maximum Range	350km*
	Amphibious	Yes
	Front Cabin	1 Driver, 3 Passengers
	Rear Cabin	10 Passengers
Vehicle Weight	Kerb Weight	6,000kg
	Payload	4,000kg
	Gross Vehicle Weight	10,000kg

*The speed/range may vary as per the nature of terrain.

TALWAR

**India's First Indigenously Designed, Developed & Manufactured
16 Tonner Amphibious, Armoured, Articulated, All Terrain Vehicle
Indian Army DGQA & Infantry Summer & Winter Trials
Successfully Completed in 2023-24.**

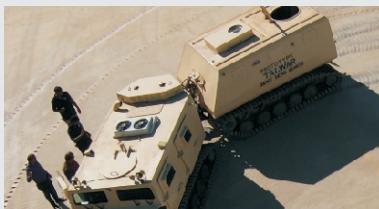

"Talwar" is a twin-chassis/cabin bullet proof vehicle developed to traverse difficult terrain, creating low ground pressure, flexibility, high payload capacity, spacious interiors, easy transportability, if required mine protection, turret, light machine gun mounting and electrical/hydraulic self recovery may be providing.

It is a fully amphibious vehicle not requiring any preparation. The rubber tracks and the running gear system fitted to the vehicle provide soft and quiet ground conditions creating low ground pressure. These tracks enable the vehicle to traverse any terrain including fordability in water and commute through mud, swamp, soft sand and snow.

TYPE OF VIEWS

Turning Radius 8m

Side Slope 17°

Gradient 31°

Vertical Stape 0.7m
